

# **BRG ROTATIONS**

DECEMBER 2022

Please change filters to ensure you are reading assigned cases. For example, if you are at Sandler and only have a Sandler filter or BCI filter on you are filtering out many assigned cases. Cases will be assigned by technologists to BCI, HX and IC , DC. In the event it is not assigned, please notify technologist to assign case.

## **HX reading responsibility:**

### **Read DCA 8am to 1 pm.**

Read off PBG, Float 1 list and DCA Boca list. **Oldest cases first.** Read off of lists that are the largest first. Once a list is less than 40 cases please read from another list.

If you read subspeciality cases such as prostate, DCA neuroradiology or BO 1 list please read those cases first.

If you routinely read neuroradiology (MR brain and spines) and BO list is over 40 cases you should read off this list first.

Once a list is under 40 help read from other lists (BO 1 list and DCA cases from PBG, Float 1, DCA Boca).

### **Hx 1pm to 5 pm: Read WCI and Hospital**

Hx will be responsible for (plain films, CT non breast us cases from WCI (except MR brain and MR spine this will be read by BCI).

Read hospital cases. The hospital list should be caught up for on call radiologist by 5 PM.

If we do not have a cardiac reader and you are HX you are the cardiac reader. Read cardiac cases and TAVR CTA cases **(8-5 PM)**

\*If there are 2 HX radiologists we do not need both radiologists to read WCI and hospital. One radiologist should read DCA for the entire day.

### **Sandler Radiologist Reading:**

All Sandler cases (except MR brain and spine cases and nuclear medicine cases and PET cases)

All hospital and Sandler fluoroscopy cases

Body MR cases from BCI, WCI.

## **10-7 PM reader/Body Reader**

Please review schedule prior to your shift. If Dr. Staszal is working you will be responsible for reading PBG. He will read the float list.

If he is not working, read DCA Float 1 list.

5 PM to 7 PM read stat cases from all DCA sites. All stat cases should be read or have preliminary read.

### **BCI Reading List:**

- MR brain and MR spine from WCI will be read by BCI and will be assigned.
- Sandler MR brain and spines will be assigned to BCI.
- Neuroquant MRI stroke perfusion cases will be assigned to BCI

**- All STAT WCI cases will be covered from 8am to 1 pm by BCI.**

-BCI to read all BCI cases except chest CT, this will be read by Clint Moore (DC) radiologist

- DCA neuroradiology list
- Outside ENT/neuroradiology cases

-In the event there is a chest and abdomen these studies will be read by BCI.

If we do not have a assigned HX reader or HX person is covering DCA cardiac cases (Joel Morris is away) BCI will still need to read WCI.  
This will be indicated on QGenda schedule.

### **Clint Moore Radiologist Reading List:**

Clint Moore cases  
Deerfield cases  
Assigned outside cases  
Chest CT exams from BCI
